

Abdurrahman Firdaus

Forward Deployed Engineer & Tech Lead

Bali, Indonesia | hello@abdurrahmanfirdaus.com | [+6285603520775](tel:+6285603520775) | linkedin.com/in/abdurrahman-firdaus/ | github.com/daws11 | abdurrahmanfirdaus.com

SUMMARY

Forward Deployed Engineer based in Bali. I sit with the team, find what's actually broken, ship the smallest fix that unsticks it, and stay until they reach for it without thinking. I lead the Technology & Innovation Lab at PT Unicorn Food and Service, owning end-to-end delivery of every internal product - from PRD and roadmap to real-time integrations and adoption. Five production apps are now in daily use across kitchen, finance, warehouse, HR, and bookings teams. How I work: Discover to Design to Deploy to Drive adoption - I don't write a line of code until I've watched the team do the work by hand.

SKILLS

Full-Stack: React, Next.js, TypeScript, Node.js

AI Agents: n8n, RAG, Mastra AI

Integrations: Xero, iSeller, WhatsApp Business API, Instagram Graph API, TikTok, Teaspoon Lab

Infrastructure: PostgreSQL, Docker, Python

EXPERIENCE

PT Unicorn Food and Service

Tech Lead

Oct 2025 – Present

- Lead the Technology & Innovation Lab: end-to-end FDE ownership of every internal product.
- Discovery at the desk, not on the whiteboard.
- PRDs, roadmaps, exec reviews, real-time integrations with Xero, iSeller, Teaspoon Lab, WhatsApp Business, Instagram Graph, TikTok.
- Promoted from Fullstack Developer to Tech Lead after 2 months for owning shipping velocity and adoption.
- 5 production apps in active use across 6 internal teams (kitchen, finance, PC, warehouse, marketing, ops) - replacing ~6 vendor tools and 4 manual workflows.

Fullstack Developer

Aug 2025 – Oct 2025

- Joined to containerize the stack.
- Standardized deployment on Docker + CI/CD so every subsequent ship is one command.
- Built the first two internal tools before being promoted to Tech Lead.
- Cut deploy time from ~30 min manual to 90s one-command across 5+ subsequent releases; zero rollback incidents post-standardization.

Datau3

Fullstack Developer

Jan 2025 – Aug 2025

- Contract engagement at a consulting shop.
- Built MVPs and PoCs for sales engineering and R&D pipelines, deployed on Render.
- Short tenure was contract-defined; took the next role when the engagement closed.
- 4 shipped MVPs, 2 converted to paying pilots.

Digitalinkuy

Fullstack Developer

Oct 2023 – Jan 2025

- Built POS cashier apps and warehouse management for an F&B SaaS product.
- Implemented complex schemas, business logic, and third-party API integrations.
- Left when the company pivoted from product to services and the in-house engineering team was downsized.
- 2 production systems handed to maintenance; 3 major integrations live at handoff (Xero, payment gateway, inventory).

Polda Metro Jaya Crime Dashboard

Fullstack Developer

Jun 2023 – Nov 2023

- Government contract - built an internal data-visualization dashboard for DKI Jakarta crime data.
- Project-defined end date; the 5-month tenure was the contract length, not a choice.
- Dashboard in continuous use by the requesting unit past contract end.

Bersinar.id

Vice-Chief of Tech Department

Jan 2021 – Jul 2021

- University engineering organization leadership role.
- Led a 12-person team across two student-run products while completing a Bachelor's in Software Engineering (Telkom University, 2020-2025).
- 15+ features shipped, 50+ reviews, ~30% faster cycle time vs prior year.

PROJECTS

- [Finance](#) - Replaced three-tab reconciliation with a single inbox view (Reconciliation: 4h to 10m / day, finance team of 3+) - Stack: Next.js, TypeScript, Xero API, PostgreSQL
- [Purchasing](#) · [Warehouse](#) · [Outlets](#) - Replaced paper + WhatsApp + 3 spreadsheets with one inventory system (Stocktake time: 30 min to 2 min / outlet) - Stack: React, TypeScript, PostgreSQL, Teaspoon Lab API
- [This is Bali](#) · [Restaurant ops](#) - Four inbound channels unified into a single queue (Manual messages: ~50+ / day to 0) - Stack: Mastra AI, Next.js, TypeScript, WhatsApp Business API, Instagram Graph API
- [Kitchen](#) · [Outlet Ops](#) - iSeller sales + Teaspoon Lab usage unified into one real-time dashboard (Margin visibility: manual/ad-hoc to daily) - Stack: React, TypeScript, Teaspoon Lab API, iSeller API, PostgreSQL
- [HR](#) · [Workforce](#) - In-house HRM replaces third-party bill that scaled with every hire (HRM spend: IDR 15jt/mo to IDR 0) - Stack: React, Next.js, TypeScript, React Native, PostgreSQL

EDUCATION

Bachelor of Software Engineering - Telkom University

2020 – 2025
