SUMMARY

I am a Software Engineer and Tech Lead with 3+ years of experience designing, developing, and maintaining high-quality software solutions. Proficient in full-stack development with a strong focus on JavaScript frameworks, I have grown into a leadership role spanning product management, systems integration, and end-to-end application delivery. Experienced in leading cross-functional teams, authoring technical documentation, integrating third-party platforms, and aligning technology strategies with business objectives. Known for boosting project completion, improving code quality, and delivering top-notch user experiences.

EXPERIENCE

Tech Lead 10/2025 - Present

PT Unicorn Food and Service

- Led end-to-end development of multiple internal web applications including an Inventory App (stocktake, loss analytics, purchasing workflow), Finance & Invoice App (real-time analytics dashboard, invoice system), Training Platform & Hiring Tools (Connect Team Clone with AI Agent for recruitment automation), and Kitchen App (mobile scanner for food preparation time tracking).
- Defined product requirements by authoring PRDs and weekly roadmaps; conducted onboarding, briefings, and oversight for part-time developers.
- Presented weekly management calls highlighting top wins, roadblocks, and business priorities to senior leadership.
- Collected and translated user feedback from Kitchen and People & Culture teams into actionable features and bug fixes.
- Architected real-time integrations with Xero accounting system, managed official WhatsApp API Gateway migration, and handled SFTP integration for Tspoonlab.
- Executed complex data migrations from legacy spreadsheets and Asana into new application databases.
- Developed automation solutions including Google Review Automation and WhatsApp Cron Job Reminder; authored long-term tech strategy documents.
- Served as first-line technical support for field teams, resolving application and website (This is Bali) issues in real time.

Fullstack Developer 08/2025 - 10/2025

PT Unicorn Food and Service

- Architected and maintained core full-stack systems, leveraging Docker for standardized deployments.
- Led full-cycle development of 5+ web applications using React, Node.js, and PostgreSQL.
- Implemented automated CI/CD pipelines, significantly improving build and deployment frequency.
- Executed comprehensive unit and integration testing to ensure high system stability and performance.
- Developed key technical documentation (API/Infrastructure) to improve team collaboration and onboarding.

Fullstack Developer 01/2025 - 08/2025

Datau3

- Developed and maintained scalable web applications (front-end and back-end).
- Built proof-of-concept demos and MVPs to support sales, client engagement, or internal R&D.
- Deployed and managed applications using Render.
- Collaborated with project leads and designers to deliver functional prototypes quickly.
- Troubleshoot and optimized existing demos and services; wrote clean, reusable, and documented code.

Fullstack Developer 10/2023 - 01/2025

Digitalinkuy

- Designed and developed functional web and mobile applications (POS cashier apps, warehouse management systems).
- Wrote clean, structured, and maintainable code for both frontend and backend.
- Implemented complex business logic and ensured seamless integration between application components.
- Designed and managed database schemas for efficient data storage and retrieval.
- Developed and integrated APIs, both internal and third-party, to expand application functionality.
- Ensured application quality through comprehensive testing, resolved user-reported issues, and maintained applications to meet evolving business needs.

Fullstack Developer 06/2023 - 11/2023

Polda Metro Jaya Crime Dashboard

- Designed and developed a Data Visualization Web Application tailored for internal stakeholders of Polda Metro Jaya.
- Integrated crime data from DKI Jakarta into interactive and visually impactful dashboards.
- Collaborated with stakeholders to identify critical data visualization needs and optimize the user interface.
- Implemented data processing and transformation pipelines to ensure accuracy and real-time updates.
- Utilized modern web development tools and frameworks to create scalable and responsive visualizations.
- Conducted usability testing and gathered feedback to refine application features and performance.

Vice-Chief of Tech Department 01/2021 - 07/2021

Bersinar.id

- Designed, developed, and maintained high-quality software solutions, boosting project completion by 30%.
- Collaborated with product managers, designers, and cross-functional teams on 15+ new features.
- Ensured code quality and maintainability by participating in 50+ code reviews.
- Identified and resolved 100+ software-related issues, ensuring a top-notch user experience.
- Kept the team updated with the latest industry trends, tools, and best practices, leading to a 20% efficiency improvement.
